

MacNeal
Hospital

PGY-1 Pharmacy Residency Program

ABOUT US

MacNeal Hospital is proud to be a part of Loyola Medicine and Trinity Health. For nearly a century, MacNeal Hospital, located in Berwyn, IL has been providing quality healthcare in the near western suburbs and the city of Chicago.

MacNeal Hospital's PGY1 pharmacy residency program is in candidate status, finishing up its first PGY1 graduates in 2025. We are currently recruiting 2 residents for the upcoming 2025-2026 residency year.

Our program is geared toward the community hospital pharmacist. We strive to develop clinical practitioners who will possess the clinical acumen and assertiveness to provide comprehensive pharmaceutical care to our patients. Residents will be integrated into the pharmacy department and medical teams, serve on hospital wide committees, and participate in a variety of projects and topic discussions. Residents will complete a teaching certificate, as well as precept students on rotation. Blending clinical skills, operations and leadership, we hope to graduate well-rounded practitioners who will be successful within the evolving healthcare environment.
